

AMENDMENTS TO THE SPECIFICATION

Please replace Paragraph [0022] with the following paragraph rewritten in amendment format:

[0022] In this embodiment, an air conditioning unit is conventionally installed inside an instrument panel (both of them are not shown). The air conditioning unit conventionally has a normal configuration, that is, it has ~~[[an]]~~ a unit case, a blower unit attached to the case to cause the flow of air, an evaporator, a heater unit, an air-mixing door, some ducts, blow-out ports and the like. One of the ducts extends to a center console of the vehicle ~~(not shown)~~, and is connected to a center duct 21 (partially shown) for the air conditioning apparatus for a rear seat.
